DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. Terms such as "an FALK-flexible coupling" "bi-directional plunger pump" "planetary speeder" "oil motor" "magnetic valve" "FSE 716 reciever" "PLC intelligent module" "FSS 716F transmitter" etc. are critical or essential to the practice of the invention, included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). The drawings show these claimed aspects but they are not described in the specification and are only mentioned in a cursory manner. These terms are not common in the art and therefore should be explained in the specification.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a

Art Unit: 3654

manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The following terms are misunderstood: FALK-flexible coupling" "bi-directional plunger pump" "planetary speeder" "oil motor" "magnetic valve" etc.

Claims 3-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "some" in claim 3-5 is a relative term which renders the claim indefinite. The term "some" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. It is unclear how many shock-absorbing buffers, shock-absorbing rubber buffers, or shock-absorbing wire rope buffers are fixed on the trestles.

Conclusion

Because of the insufficiency of the disclosure and indefiniteness of the claims as described above, the claims cannot be meaningfully treated with respect to the prior art at this time.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
